Subject: RE: KUA dormitories

Good morning, Larry:

Phil Biron from the Fire Marshall's Office has indicated he will take a look at your Fire Protection Engineer's letter Thursday or Friday. No worries, KUA will be able to start the project without delay. In Plainfield we don't even require a BP for site work, your free to be working right up until concrete is poured without anything from the town.

In all cases, we will work with you to keep the project moving along. Its in all of our best interest to hear something from the Fire Marshall's office. You don't want any surprises when Chief Taylor walks the Fire Marshall through the completed project.

Enjoy graduation, don't fret over this, the project will move along as planned and whatever issues need to be worked out, we will work out together. You folks have assembled an "A" plus design team. You may not think so at this very moment, but we are doing you a favor to cover every base a couple of times. Chief Taylor and I have been through this process in the past and we got this.

Subject: RE: KUA dormitories

Hi Steve,

To keep things moving on our end KUA would be okay with a Conditional upon Fire Marshall review permit, especially with the level of consultant expertise and their issuance of stamped drawings.

The A/E team has included fully sprinklered fire protection as well as assembly ratings that have been reviewed and accepted by a third-party code compliance firm. If modifications are required from the State Fire Marshall's office we can implement as required during the course of construction - The first 4-6 month of construction is

primarily site, concrete, structure and weather tight components, - This timeline would be more than enough to address any Fire Marshall comments without impeding construction start.

I would be happy to meet with you and VIA to discuss further.

Thanks,
Larry

Stephen,

Thank you for the update. Please let me know when you receive a response from him. In addition Iâ€™ll reach out to him tomorrow by phone. In the meantime would it be possible for the town to issue KUA a â€œnotice to proceedâ€ with site and foundation work to allow them to keep the ball rolling?

Thanks,

STEFAN RICHTER

Subject: FW: KUA dormitories

To all

It appears that Chief Taylor wants one more level of assurance. I am hoping that the Fire Marshall's office will respond quickly so that we can move forward with permitting. Go ahead and submit for the permits, but since the Chief has asked, I feel we now have to wait for a response.

Subject: KUA dormitories

Phil,

Kimball Union is set to begin construction on two new dormitories next month. Early on in the project, (Jan 2023) I suggested that the architect reach out to the Fire Marshall's Office to assure compliance with the life safety codes. I do not have the necessary expertise for a project of this size and complexity. They have hired Bergeron Technical Services to review the plans. Bergeron sent a letter to your office on 5/18/23 that basically says that they believe the project as designed meets all of the necessary codes and that they would like the Town to issue the building permits. Is this enough of a review for the permits to be issued or should your office get involved and do any further review of the plans? Your advice as to how the process should work and where it needs to go from here is greatly appreciated.

Sincerely,

--

Bill
