Hi Steve,  
I have no objection to the proposed pole barn on the Brite Lite property as long as:

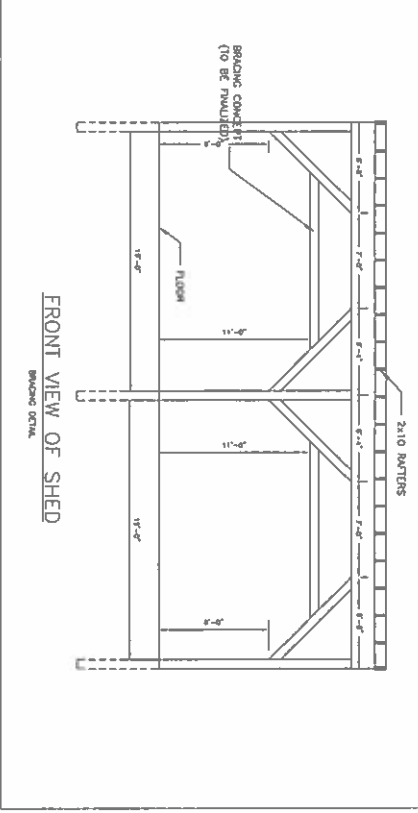

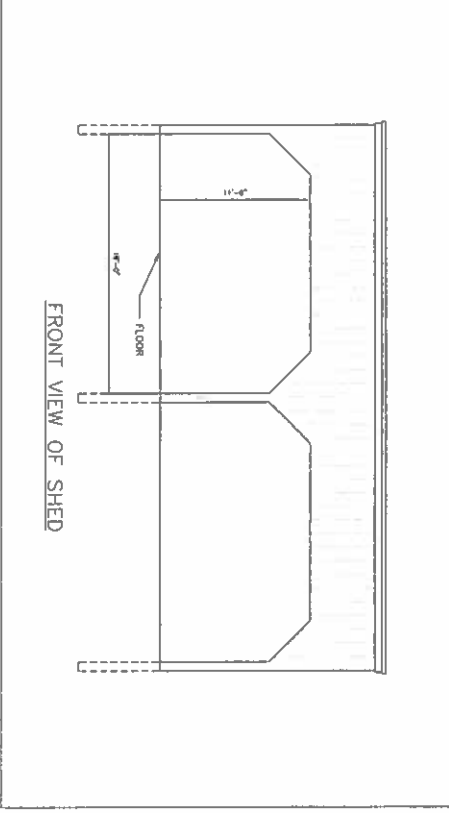

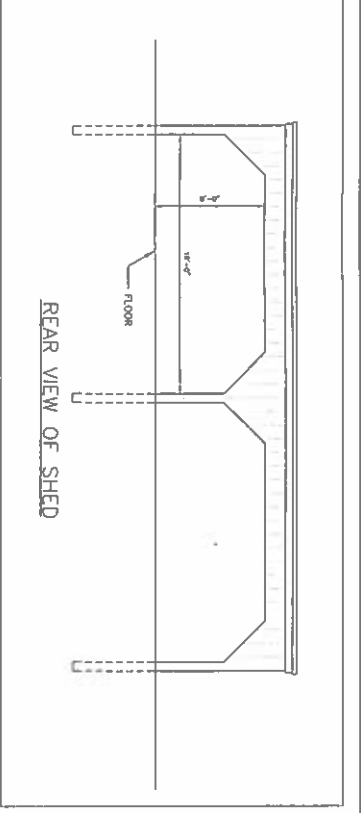

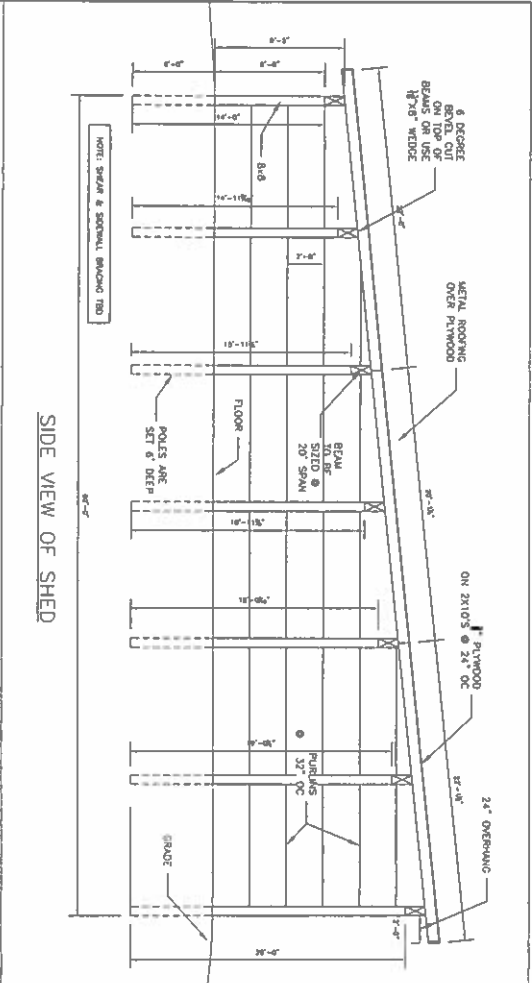

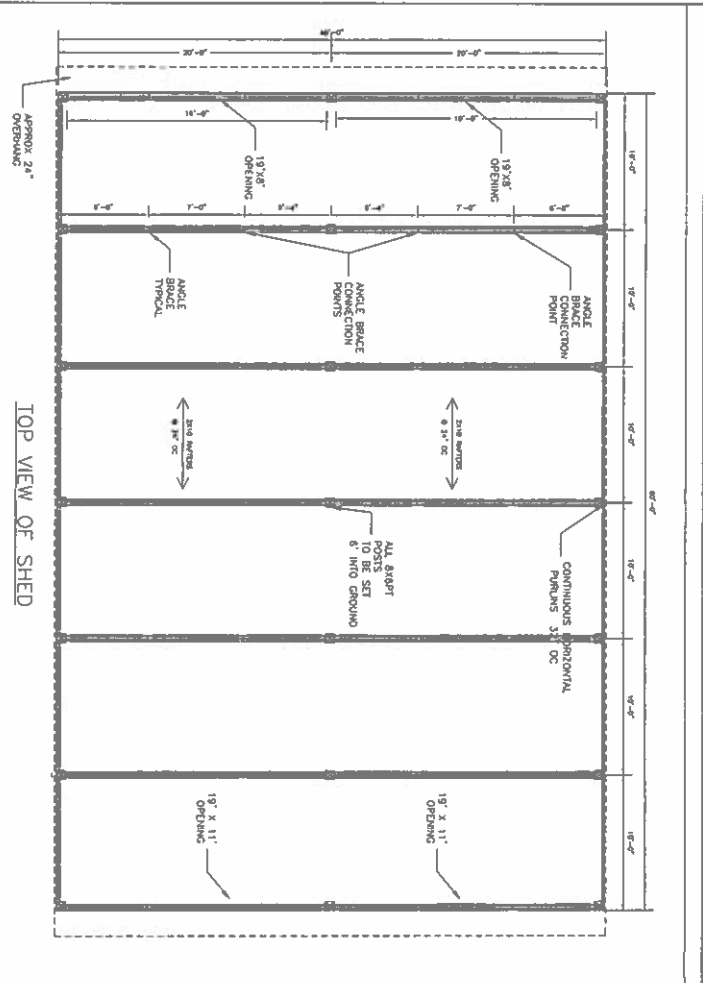

1. Maintain 15'+ from the lot line per zoning.
2. Maintain any applicable wetland buffer.
3. Take precautions to manage runoff caused by the new impervious area, since the runoff is directed to the brook.
4. Observe the required maximum of 40% lot coverage for impervious surfaces. This is important on the subject property because of the brook.

Chris
