Powerwall and Equipment

AC Disconnect

We are excited to design your home of the future and for you to join our mission to accelerate the world's transition to sustainable energy.

The day of your installation, our team of two to three people will install your Powerwall. If you also have solar, an additional four installers could be on site.

To ensure a quick and efficient installation, clear the ground, wall space, and any key access points. Extra space is great since we may use a small dolly to move Powerwall around.

We look forward to getting started
