

***Your fire departments need help with many tasks, not just fire-fighting.***

**Level I Firefighters** are prepared to fight structural and wildland fires. The State provides 120 hours of training which is supplemented by regular training exercises at the station. Level I firefighters are the backbone of our volunteer department!

**Driver / Pump Operators** are needed. These volunteers must get our trucks to a fire and get the water flowing. A commercial drivers license (CDL) is required to drive the trucks. Training to operate the pumps will be provided at the station.

**Apprentice Firefighters** provide support at a fire site by getting equipment ready and by providing support to the firefighters outside of the “red zone.” Equipment and safety training will be provided at the station.

**Station Helpers** provide support at the station. They can be equipment managers, computer operators, bookkeepers, cleaners, or just be available for “duties as assigned.” If you have a special skill and wonder if we might need your help, ASK!

***If you would like to volunteer, ...***

Contact the chief, deputy chief, or any of our corporate officers for more information and/or for an application. Or just drop by at one of our business meetings or at one of our training drills.

All volunteers must be 18 years old, of good character, and physically able to complete their duties.
