

## ARC Ventilation & Heating System Budget Estimate

August 10, 2016

### Copied from E mail

I would allow between 15k & 20k for separated combustion lp gas fired unit heaters with gas piping. Gas tanks and regulator by others. For the office area I would allow \$15k for ductless cold climate heat pumps and an energy recovery ventilation system. Please call me with any questions.

Brian Sager

July 18, 2016

### Copied from E mail

I would allow \$26,500.00 to ventilate the town garage which would include the following:

- One lp gas direct fired make-up air unit with blower, gas heat section, damper mixing box, discharge air sensor and differential pressure sensor.
- One sidewall propeller type exhaust fan with through wall hood and motorized damper.
- One ventilation control panel with CO & NO2 sensors.
- Lp gas piping,- Ductwork.

Exclusions:

Power wiring and disconnects, Permits, Lp gas tanks, primary piping and regulator

Please call me with any questions
